

Carolyn De La Cruz, MD, is a plastic and reconstructive surgeon specializing in breast reconstruction and lymphatic surgery. She completed general surgery residency at Robert Wood Johnson and plastic surgery residency at the University of Miami, followed by a microsurgical fellowship at the MD Anderson Cancer Center. She serves as Associate Professor, Vice Chair of Faculty Development and Mentorship and Director of Lymphatic Surgery and the Lymphatic Biology Lab at the University of Pittsburgh Medical School. Dr. De La Cruz is actively involved in academic surgery through research, mentorship and national society leadership. Her work focuses on improving reconstructive outcomes, advancing lymphatic surgery and supporting the next generation of surgeons through education and outreach initiatives.
