

Michael Zenn, MD, has practiced plastic and reconstructive surgery for over 30 years. He completed his training in plastic surgery at Massachusetts General Hospital in Boston and fellowship training in microsurgery at Memorial Sloan Kettering Cancer Center in New York City.

Dr. Zenn spent his formative career in academic medicine as a Professor of Surgery at Duke University, where he served as Residency Program Director, started the Duke Flap Course and was deeply involved in surgical education. He later transitioned into industry as Chief Medical Officer of a medical device company that developed SPY and currently owns a successful private practice in Raleigh, North Carolina.

He is the author of “Reconstructive Surgery” and maintains an educational YouTube platform with over 25 million views. As a visiting professor, he focuses on surgical judgment, complication management and navigating diverse career pathways in plastic surgery.
