

Over the past 13 years, I have made a number of contributions to plastic surgery. At MSKCC, I am the Program Director and have led the expansion of one of the strongest microsurgery training fellowships. I have participated in institutional structural reorganization as the physician leader of the Inpatient Operations Leadership Team and serve as a Vice Chair for Health Information and Technology in the Department of Surgery. Shortly, I will serve as the Co-Chair of the Physicians Advisory Council for Epic implementation at our center. Externally, I have served as the scientific program chair for the annual meetings of the Northeastern Society of Plastic Surgeons (NESPS) and American Society of Reconstructive Microsurgery (ASRM). I was the senior member-at-large to the Executive Council of ASRM and now serve as the organization's Historian as well as chair of the Website Committee. I am on the Board of Directors of the NESPS and serve as the current treasurer. I am an oral examiner for the American Board of Plastic Surgery. As a health services researcher, I have produced a number of highly cited works on insurance, disparities, cost-effectiveness, patient-reported outcomes (PRO) and value. I am currently the principal investigator of a randomized controlled trial of prepectoral breast reconstruction with and without acellular dermal matrix. My scholarship has been recognized by The International Society for Quality of Life for creation of a new PRO measure, the Plastic Surgery Foundation (PSF) Clinical Research Leaders Scholarship, and appointment to *Plastic and Reconstructive Surgery (PRS)* and *PRS Global Open* editorial boards. I am member of the American Surgical Association, the nation's oldest and most prestigious surgical organization. I am a past Chair for the ASPS/PSF Clinical Science Study Section and currently serve as the Vice Chair of the Clinical Research Committee. My clinical expertise is in complex head and neck reconstruction using virtual surgical planning and immediate dental implant placement. I have been named a "Top Doctor" in New York City from 2018-23.
